Dear Professor Xiangqun Cui,

Australian Astronomical Optics at Macquarie University (AAO) is pleased to invite you to visit and tour our facilities as part of your upcoming visit to Australia in November 2018. During the visit you will see our laboratories, meet staff from AAO-Macquarie and the Department of Physics and Astronomy and discuss our mutual interests in large scale optical astronomical instrumentation.

We envisage your visit to AAO-Macquarie will take place during the period 26-30 November 2018 with the visit to Macquarie on 27-28 November 2018. I understand you will also visit our partner nodes at the University of Sydney and the Australian National University in Canberra during your visit.

We at Macquarie University look forward to welcoming you for what we expect will be a stimulating and successful meeting.

Yours sincerely
